The Main purpose of the Project

The Name of the project we are researching is called the Butterfly effect, we found this on <http://sourceforge.net/apps/trac/tbe/wiki/WikiStart> [1] we found this link on a website called www.sourceforge.net [2].

The Main Purpose of the project

This is the TRAC (project management environment) for TBE. You can use TRAC to see what is going on in TBE development; to file bugs and feature requests.

The Butterfly Effect is a game about cause and effect. You build complex systems to accomplish simple tasks like hitting a Bowling Pin. This is also known as a Rube Golding Machine or a Heath Robinson Contraption. This type of game was pioneered by the game series the incredible machine in the 1990's.

Trac is licensed under the modified BSD license.
