

## extras

**note** odd things that you dont necciseraly need but are very useful and cool nontheless

[BACK](#) [1]

boarder around the whole page

change the 0 to 100 and anything below to give the width

```
<style type="text/css">body {border: 0px solid BLACK;} </style>
```

-----

cursorse

main code

```
<style type=text/css>
```

```
body{cursor:TYPE}
```

```
a {cursor: TYPE} </style>
```

for a curser that you would like, copy an option from the list below, then replace TYPE in the code above with your option.

4-Sided Arrow Cursor

move

crosshaired cursor

crosshair

Arrow pointing up

n-resize

ne-resize

arrow pointing right

e-resize

arrow pointing diagonally down and right

se-resize

arrow pointing down

s-resize

-----

for a box that showes any text [be writing or html code] simply copy the text below

```
<TEXTAREA>YOUR TEXT <TEXTAREA>
```

-----

code for a fixed background [does not work on all websites]

```
<style>body {background-color:
```

```
#FF0099;
```

```
background-image:
```

```
url(direct lik - url of picture for the background goes here);
```

```
background-repeat:
```

```
no-repeat; background-position:
```

```
right;
```

## extras

-->

---

background-attachment:  
fixed}</style>
