

## Entry 3 - Unit 3 - Packaging Safety

### Assessor's guide to interpreting the criteria

#### General Information

- Entry Level 3 in the Qualification Credit Framework. It is mapped to the National curriculum at levels 3 and 4.
- The definition of an entry level qualification is to recognize basic knowledge and skills and the ability to apply learning in everyday situations under direct guidance or supervision. Learning at this level involves building basic knowledge and skills and is not geared towards specific occupations.
- The criteria are designed to provide opportunities to promote numeracy, literacy and social skills as well as ICT capability and are fully compatible with the UK National Curriculum programmes of study with some strengthening of important contemporary issues related to open systems providing support for PLTS and citizenship.
- Bronze 3 is designed to promote a wider range of participation by providing a progression pathway from Bronze 2 to Level 1 in the RQF and from national curriculum levels 3 and 4 to level 5.
- The specification for the Entry Level 3 certificate provides an outcome framework for assessment and is not intended to dictate any particular context for learning and so can be used with young children or adults.

#### Requirements

- Standards must be confirmed by a trained Bronze Assessor or higher
- Assessors must at a minimum record assessment judgements as entries in the on-line mark book on the INGOTs.org certification site
- It is expected that there will be routine evidence of work used for judging assessment outcomes in the candidates' records of their day to day work. Samples should be available at the annual visit and/or by video conference.
- Different approaches to learning will be required in order to match differing needs, for example, the needs of children will be different from the needs of adults with learning disabilities.
- Completing the criteria for this unit entitles the candidate to the Award of the Entry level 3 Unit . In general, the candidate should demonstrate that criteria related to co-operative behaviour can be sustained over time.
- We expect at least 15 hours of guided study to be under-taken before this Unit Award is made to those new to computers but discretion can be used to take account of prior learning where this is sensible in individual cases. In terms of making the award, what matters is outcomes.
- Certificates must be printed on INGOT logo template paper for which there is a charge of 50p per template

### Assessment Method

Assessors can use the criteria to determine levels of prior learning through dialog with the candidate, direct observation and any other appropriate and relevant evidence. They can score each of the criteria "L", "S", "H". An "N" indicates no evidence and this is the default setting. "L" indicates some capability but some help still required and the candidate is not secure with that particular criterion. "S" indicates secure mastery of the criterion. "H" indicates that the candidate is operating beyond the basic requirements of the criterion. If all criteria are matched with "S" or "H" the unit is passed. All criteria must be at least "S" for a pass.

### Expansion of the assessment criteria

The Entry 3 learner will be becoming increasingly capable of making use of skills, knowledge and understanding to carry out simple structured tasks and activities with occasional guidance and intervention. They will start to relate tasks to contexts and be aware of consequences of actions for themselves and others. While support and guidance are still needed they will demonstrate increasing capability of working self-sufficiently with simple structured tasks.

#### An activity will typically be 'structured' when:

- \* there are several steps that need to be sequential; and
- \* the learner has opportunities to practice the sequence or clear guidance is provided.

## 1. The candidate will carry out packaging safely

### 1.1 I can monitor production settings

The candidate should be able to monitor production

**Evidence:** Relevant information in their publications and documents.

#### Additional information and guidance

Various devices and equipment in the process will have unique settings for individual tasks and candidates should be comfortable working with these settings as required.

### 1.2 I can check tools and equipment for safety

Candidates should be able to demonstrate safety protocols

**Evidence:** From portfolio files and assessor verification.

#### Additional information and guidance

Production line type equipment is under a lot of use and can fail badly and with serious consequences if not maintained. Candidates should carry out regular and routine inspections of equipment to make sure they are safe to run.

### 1.3 I can control the flow of raw materials

Candidates should be able to work equipment effectively

**Evidence:** From portfolio files.

#### Additional information and guidance

The packaging process will require some form of raw materials as an input and these will need to be

---

(function(i,s,o,g,r,a,m){i['GoogleAnalyticsObject']=r;i[r]=i[r]||function(){(i[r].q=i[r].q||[]).push(arguments)},i[r].l=1\*new Date();a=s.createElement(o),m=s.getElementsByTagName(o)[0];a.async=1;a.src=g;m.parentNode.insertBefore(a,m)})(window,document,'script','//www.google-analytics.com/analytics.js','ga'); ga('create','UA-46896377-2','auto'); ga('send','pageview');

in the correct form, type, temperature etc to work properly. Candidates responsible for this section will need to be aware of the correct parameters.

### 1.4 I can identify unsafe situations and take appropriate action

Candidates will be able to demonstrate good safety awareness

**Evidence:** Assessors observation of finalised published work.

#### Additional information and guidance

Candidates should be aware of situations that are potentially unsafe and take the appropriate actions, either by guidelines or common sense.

### 1.5 I can maintain a clean and tidy environment

Candidates will be able to keep the working area safe and clean

**Evidence:** Assessors observation of finalised published work.

#### Additional information and guidance

Many accidents at work occur due to loose cables or equipment lying around. Candidates need to be encouraged to keep their areas safe and tidy and clean up after themselves and others as required.

### 1.6 I can comply with regulations and guidelines

Candidates will be able to understand the legal constraints

**Evidence:** Assessors observation of finalised published work.

#### Additional information and guidance

Most work environments will have specific local guidelines, but also be governed by regulations and laws on health and safety at work. Candidates need to show an awareness of these and apply them to the best of their ability.

#### Moderation/verification

The assessor should keep a record of assessment judgements made for each candidate and make notes of any significant issues for any candidate. They must be prepared to enter into dialog with their Account Manager and provide their assessment records to the Account Manager through the on-line mark book. They should be prepared to provide evidence as a basis for their judgements should it be required by the Principal Assessor or their Account Manager/external moderator. Before authorising certification, the Account Manager must be satisfied that the assessors judgements are sound.
