

Art and Design, P Scale

Art and design stimulates creativity and imagination. It provides visual, tactile and sensory experiences, and is a unique way to understand and respond to the world, and to communicate with others. Pupils learn about the place and role of art, craft and design in life today, as well as in different times and cultures.

The Ingot's Art and Design P scales provide learners with the opportunity to:

- experience, experiment with and use colour, form, shape, space, texture and pattern
- explore different materials and processes
- respond to and communicate what they see, feel and think, on their own or working with others
- value and assess their own and others' achievements

In response to these opportunities, pupils can make progress in art and design by:

- moving from responding to familiar ideas and themes when they start their work, to exploring ideas for different reasons, and selecting and using relevant information to help them develop their ideas
- sensory exploration and the use of a variety of materials and processes (to make images and artefacts), investigating and combining materials and processes, organising visual and tactile qualities and matching these to ideas and intentions
- being aware of their own and others' work, describing what they think and feel about their own work, and the work of artists, craftspeople and designers
