

Hackers

Hackers

What are hackers?

A hacker can be an expert on the computer. These hackers are experts, they are someone who breaks into computer security networks for his own purpose.

What do they do?

Hackers break down people's computer in order to look at information needed and possibly do harm to that people's computer or files. Hackers use computer programs or netbots to get into computers and some get help from computer technician.

Why are they dangerous?

Because they can send you viruses and steal your account and bank logins nad so many more dangerous things it is shocking!
