Computer Hacking

Links: Home Importance of saving work Computer Viruses Computer Hacking	A hacker is a person who breaks into computers and computer networks for profit, in protest, or because they are motivated by the challenge. The subculture that has evolved around hackers is often referred to as the computer underground but it is now an open community. Other definitions of the word hacker exist that are not related to computer security. They are subject to the long standing hacker definition controversy about the true

meaning of hacker. In this controversy, the term hacker is reclaimed by computer programmers who argue that someone breaking into computers is better called a **cracker**, not making a difference between computer criminals ("black hats") and computer security experts ("white hats"). Some white hat hackers claim that they also deserve the title hacker, and that only black hats should be called crackers.
