	Hacking
Home [1]	
Viruses [2]	What is hacking?
Hacking [3]	Hacking is when someone hacks into your computer and can find out about everything that is in your computer. They can get access to your computer and can take over everything. They can also get hold of your work and can copy it. The hackers think that when hacking into a computer it is a work of art but it actually isn't.
Back-ups [4]	What damage can hackers do? As I said hackers can get into your computer and can control everything and can get hold of any personal information that is in your computer which is not good and can lead into big trouble for the owner of the computer. They can also damage parts of the computer. How can you stop hackers being able to get on your computer? It's very easy from hackers being able to get on your computer. There are many ways on of them are to get a special software to stop the hackers from coming on to your computer, its simple. Another way is that you make sure you don't keep ant important and personal information on your computer as they can copy it and can delete it.
