Hacking

HACKING	
Home [1] **_Viruses_** [2] **Hacking** **_Backups_** [3]	_Hacking is when a person gains acsess to your computers. They can find out your personal information and details._ Hackers like to subvert computer security without permission. They are cyber criminals. This can mean gaining access to a computer across the Internet for many purposes. How can we prevent hackers? Most people think that hackers are only a problem for servers. This is not true. If your Windows PC is not properly configured, everything on your computer can easily be stolen or destroyed by hackers.
