

Backups

	<p><u>Backups</u></p>	

	<p><u>Backups</u></p> <p><u>What are backups?</u></p> <p>Is when you copy data so you can go back to it after something has happened to your computer and you need some files, it can be in the backup, where you stored it.</p> <p><u>Different backups you could use, is?</u></p> <p>Use an external drive. Clone the computer. Backup to another computer. Create a virtual machine. Use off site backup. Use a cd, dvd, ipod and many more.</p> <p><u>Why are they good?</u></p> <p>Backups are good to have in case your computer damage and you don't have anything you need because you put all your files into one thing and when it disappears you can't blame anyone but yourself. That it is why it is good.</p>
