Each partner has established an office for administering the programme. These offices will be provided with increasing support through the rest of the results as linked to these pages. Central to the office administration is the web site [1]. The link below provides access to the criteria [2] for browsing, in each partner language. http://www.theingots.org/community/pscales [3] It provides further access to an information site [1]produced as part of WP7. There is a project brochure translated into each language Czech [4] English [5] German [6] Spanish [7] Bulgarian [8] Romanian [9] Dutch [10] The project logo is now established (See Above) with badges produced for attendance at shows and exhibitions. The quality assurance workpackage products support the development of the centres and related work packages.

The management of certification and the technology for managing criteria and translations is an extension of resources built through the INGOT LDV project. These are built into the markbook site http://awards.theingots.org [17] (username assessor1, password assessor1). Go to Assessment - Pscales - Select a subject and a level. Hover the mouse over the N under the assessment criterion to print the associated criterion in the target language. On the top menu bar click translations and go to Pscales Show to see the translation progress. Click a country name to see the translation interface **(PLEASE DO NOT EDIT!)** The SAFE project benefits from all the supporting technology developed in the INGOT project, for managing groups, managing moderation etc.

A key development that has added further value to supporting centres but which was not originally planned is the TLM Tracker system. This is described in some detail in the Additional Results section.
