

Help on the structure of the qualifications page

The purpose of the qualifications page is to give quick and easy access to supporting information for TLM accredited qualifications.

Qualifications marked with a (*) are approved for points in the school league tables.

The range of qualificatons reflects end-user demand and all qualifications are designed to a consistent assessment model.

These include qualifications that count in school league tables to management qualifications for adults.

The assessment method is designed to reduce costs, especially the bureaucracy traditionally associated with coursework.

Links from the qualifications numbers are to the qualifications as registered on the Regulator's (Ofqual's) web site.

Links from the right hand column are to supporting materials for teaching and learning. These will be added to over time.

The Help button links to the help you are reading here.

The Supporters button links to the page with information and letters of endorsement from supporting companies.

Old links are the pages that were previously linked directly to the home page. We will still utilise these by linking to them from the right hand column. The new system makes it easier to deal with the larger number of qualifications now offered and the requirements of the DfE to link supporting letters to each qualification used in schools.

QCF Level Descriptors can be found here : [Level Desctiptors](#) [1]
