The Computing qualification, as with all AOs, was removed from DfE Performance Tables from 2017 onwards in order to support the GCSE Computer Science qualification.

Level 1

Level 1, Unit 1 - Computer Science (5 credits)

1. Design, use and evaluate computational abstractions
   - 1.1 develop abstractions to represent physical objects [5]
   - 1.2 use data patterns to represent physical objects [9]
   - 1.3 follow instructions to produce a software abstraction [13]
   - 1.4 use software abstractions that model real world systems [17]
   - 1.5 identify strengths and weaknesses in computational

2. Understand algorithms
   - 2.1 write algorithms for everyday tasks [6]
   - 2.2 identify different algorithms that target the same task [10]
   - 2.3 compare algorithms [14]
   - 2.4 apply logic to efficiency and effectiveness of algorithms [18]
   - 2.5 change variables in an algorithm and predict the effect

3. Be able to use programing languages
   - 3.1 originate useful code in a visual language [7]
   - 3.2 originate useful code in a text based language [11]
   - 3.3 identify structure in programs [15]
   - 3.4 test code [19]
   - 3.5 edit source code to fix a bug [23]

4. Understand binary and Boolean Logic
   - 4.1 predict the outcome of statements containing AND, NOT and OR [8]
   - 4.2 include AND, NOT and OR in information searches [12]
   - 4.3 identify reasons why some search results are likely to be more important than others [16]
   - 4.4 relate boolean logic to program flow [20]
   - 4.5 use wildcards in searches [24]
**Level 1, Unit 2 - Using digital applications to support projects (5 credits)**

<table>
<thead>
<tr>
<th>1. Select use and combine applications</th>
<th>2. Create original works using digital applications</th>
<th>3. Be able to manage projects</th>
<th>4. Respect intellectual property</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.1 select suitable applications to support my work</strong> [30]</td>
<td><strong>2.1 originate digital information from my own imagination</strong> [31]</td>
<td><strong>3.1 structure a plan for a project supported by digital tools</strong> [32]</td>
<td><strong>4.1 identify licenses that are restrictive</strong> [33]</td>
</tr>
<tr>
<td><strong>1.2 collect and record data</strong> [34]</td>
<td><strong>2.2 use remix to create original digital information</strong> [35]</td>
<td><strong>3.2 carry out projects by linking a sequence of steps</strong> [36]</td>
<td><strong>4.2 identify licenses that are liberal</strong> [37]</td>
</tr>
<tr>
<td><strong>1.3 find patterns in data</strong> [38]</td>
<td><strong>2.3 use specific design techniques</strong> [39]</td>
<td><strong>3.3 evaluate a project in terms of its strengths and weaknesses</strong> [40]</td>
<td><strong>4.3 ensure my work contains only appropriately licensed content</strong> [41]</td>
</tr>
<tr>
<td><strong>1.4 present data effectively</strong> [42]</td>
<td><strong>2.4 match my work to a target audience</strong> [43]</td>
<td><strong>3.4 apply e-safety principles to my projects</strong> [44]</td>
<td><strong>4.4 find open source equivalents for many proprietary software applications</strong> [45]</td>
</tr>
<tr>
<td><strong>1.5 meet the needs of other people</strong> [46]</td>
<td></td>
<td><strong>3.5 show courage in completing a project</strong> [47]</td>
<td></td>
</tr>
<tr>
<td><strong>1.6 use more than one application to solve a problem</strong> [48]</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
## Level 1, Unit 3 - Computer hardware systems and networks (5 credits)

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 identify the main hardware components in computing devices [50]</td>
<td>2.1 identify a server in a network diagram [51]</td>
<td>3.1 compare the performance of cable and wireless connections [52]</td>
<td>4.1 work to support an acceptable use policy [53]</td>
</tr>
<tr>
<td>1.2 match discrete components in computing devices to purpose [54]</td>
<td>2.2 identify a range of servers and services provided by servers to networks [55]</td>
<td>3.2 relate bandwidth to data transfer capacity [56]</td>
<td>4.2 choose a strong network password and keep it secure [57]</td>
</tr>
<tr>
<td>1.3 classify hardware on the basis of purpose [58]</td>
<td>2.3 identify key services provided by internet servers [59]</td>
<td>3.3 explain the term &quot;contention&quot; [60]</td>
<td>4.3 identify encryption as a way of making information secure [61]</td>
</tr>
<tr>
<td>1.4 compare hardware components on the basis of their properties [62]</td>
<td>2.4 identify key factors that can affect server and network performance [63]</td>
<td>3.4 identify potential bottlenecks in network designs [64]</td>
<td>4.4 identify ways of minimising spam and eliminating malware [65]</td>
</tr>
<tr>
<td>1.5 identify power consumption and performance as key limits on hardware [66]</td>
<td>2.5 know about permissions and basic server security [67]</td>
<td>3.5 distinguish between local and wide area networks [68]</td>
<td>4.5 identify a firewall and explain its purpose [69]</td>
</tr>
<tr>
<td>1.6 identify cost as an issue in performance [70]</td>
<td></td>
<td>3.6 identify protocols used in networks [71]</td>
<td></td>
</tr>
</tbody>
</table>

### Level 2

```javascript
(function(i,s,o,g,r,a,m){i['GoogleAnalyticsObject']=r;i[r]=i[r]||function(){ (i[r].q=i[r].q||[]).push(arguments)},i[r].l=1*new Date();a=s.createElement(o), m=s.getElementsByTagName(o)[0];a.async=1;a.src=g;m.parentNode.insertBefore(a,m) })(window,document,'script','//www.google-analytics.com/analytics.js','ga'); ga('create', 'UA-46896377-2', 'auto'); ga('send', 'pageview');
```
Level 2, Unit 1 - Computer Science (5 credits)

1. Design, use and evaluate computational abstractions
   1.1 develop abstractions to make efficient code [73]
   1.2 use computational techniques to store patterns more efficiently [77]
   1.3 modify a software abstraction to serve a new purpose [81]
   1.4 describe software abstractions that model real world systems [85]
   1.5 describe strengths and weaknesses in computational models [89]

2. Understand algorithms
   2.1 write complex algorithms that include conditional loops [74]
   2.2 describe different algorithms that target the same task [78]
   2.3 compare algorithms on the basis of efficiency [82]
   2.4 explain the relationship between instructions and data in an algorithm [86]

3. Be able to use programming languages
   3.1 modify an existing program to extend the scope of its use [75]
   3.2 distinguish between a markup language and a programming language [79]
   3.3 originate code to solve a problem [83]
   3.4 test code using systematic methods [87]
   3.5 explain the difference between source code and executable code [91]

4. Understand boolean logic, binary and hexadecimal numbers
   4.1 show how NOT AND and OR gates can be made from NAND gates only [76]
   4.2 add and subtract binary numbers [80]
   4.3 relate 4 bit binary to hexadecimal numbers [84]
   4.4 relate binary numbers to the voltage state of a connector [88]
   4.5 explain analogue to digital conversion [92]

Level 2, Unit 2 - Using digital applications to support projects (5 credits)

1. Select, combine and evaluate applications
2. Create original works using digital applications
3. Be able to manage projects
4. Respect intellectual property
<table>

<tr>
<td>1.5 use collaborative technologies safely</td>
<td>[110]</td>
</tr>
<tr>
<td>2.5 compare my work to acknowledged good practice</td>
<td>[111]</td>
</tr>
<tr>
<td>3.5 show courage in completing a project</td>
<td>[112]</td>
</tr>
<tr>
<td>4.5 explain the terms Creative Commons and DRM</td>
<td>[113]</td>
</tr>
<tr>
<td>1.6 evaluate a project in terms of its strengths and weaknesses</td>
<td>[114]</td>
</tr>
</tbody>
</table>

**Level 2, Unit 3 - Computer hardware systems and networks (5 credits)**

**1. Understand computer hardware**

<table>
<thead>
<tr>
<th>Task</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 describe the function of the main hardware components in computing devices</td>
<td>[116]</td>
</tr>
<tr>
<td>2.1 describe a server in terms of its functions</td>
<td>[117]</td>
</tr>
<tr>
<td>3.1 describe network design features</td>
<td>[118]</td>
</tr>
<tr>
<td>4.1 describe features of a good acceptable use policy</td>
<td>[119]</td>
</tr>
</tbody>
</table>

**2. Understand the role of network servers**

<table>
<thead>
<tr>
<th>Task</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.2 explain performance criteria for key components</td>
<td>[121]</td>
</tr>
<tr>
<td>2.2 explain the performance criteria for servers</td>
<td>[121]</td>
</tr>
<tr>
<td>3.2 explain component choice based on cost and</td>
<td>[121]</td>
</tr>
<tr>
<td>4.2 describe the features of a strong password</td>
<td>[121]</td>
</tr>
</tbody>
</table>
1.3 relate computer hardware to computational thinking [124]

2.3 explain backup strategies for servers [125]

3.3 explain how networks communicate to transfer data [126]

4.3 describe a method of data encryption [127]

4.4 identify examples of unsafe practice on networks [128]
