INTRODUCTION

1. The Learning Machine Ltd is committed to ensuring that customer service excellence is integral to the planning, resourcing and delivery of all its qualifications. These standards will ensure that all sections of our diverse multi-cultural community, including those with special needs, are not excluded from any area of service delivery. The purpose of this policy is to ensure that whenever customers have contact with The Learning Machine they will receive consistently excellent standards of customer service.

POLICY STATEMENT

2. This statement provides the rationale and specific elements of policy on Customer Care and related issues.

The Learning Machine Statement

3. The Learning Machine Ltd recognises that excellent Customer Service must be an integral ingredient in the delivery of high quality services. There is the straightforward moral reason that high standards of customer service are worthy goals for any organisation but in addition there are the following benefits:

Economic - Dealing with dissatisfied customers is expensive.

Conditions of work - Staff job satisfaction is considerably enhanced when Customer Service Standards are high.

Business stability Keeping customers is generally easier than getting new ones

4. The Learning Machine is committed to continually raising standards of Customer Service. The quality of Customer Care and response to issues raised by customers are the key elements of delivering **Best Value** in a service industry.

The Learning Machine WILL ENSURE THAT:

- The Learning Machine Customer Care Policy Strategy is implemented providing a cost effective, high quality, user-friendly, efficient service.
- Customers have the opportunity to engage in the development process through the web site discussion forums and contact with The Learning Machine personnel, especially their Account Manager.
- Customers understand the complaints procedure and can use it freely as desired.
- It provides measures of customer satisfaction levels through sampling and other means
- Customers are not bothered unduly by collection of information and data from them
